

## Press Release

Tucson, AZ, July 6th 2010, NP Photonics announced today that they had shipped their one thousandth laser from production in May 2010.

“We are very excited to reach this milestone” said Micki Downey, President and CEO of NP Photonics. “Our unique ability to produce the highest performance lasers that meet the requirements of demanding industrial fiber-optic sensing environments continues to make us the market leader. We look forward to taking advantage of the forecasted growth in this area.”

*NP Photonics is a leading manufacturer of fiber lasers for the sensing, medical and research markets. The NP Photonics proprietary fiber technology is used across a broad family of products including narrow line-width, low phase-noise fiber lasers specifically designed for operation in an industrial environment.*
